

My goal for this class is to achieve a grade letter of A at the end of this semester.

Grade	Tasks (18)	Stretch Tasks (5)	DS Community Tasks	Methods & Calculation Quizzes All @ 100%	Coding Challenge	Course Goal Letter (End)
A	17-18	>= 3	>= 3 (incl. Certification )	6	>= 3	1

Here are the requirements to achieve an A and I plan on putting aside time every single day devoted to this class so I can understand little by little the topics and be able to complete each task, do all the readings, and succeed on the challenges. By working towards my goal a little bit every single day, I will be able to keep up with the load and finish the course with an A.
